W1-S2 – Design Principles

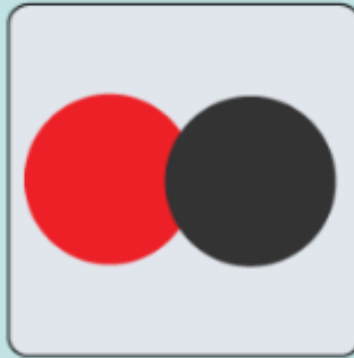

20 MIN

6 Design principles

Contrast

Alignment

Proximity

Repetition

Balance

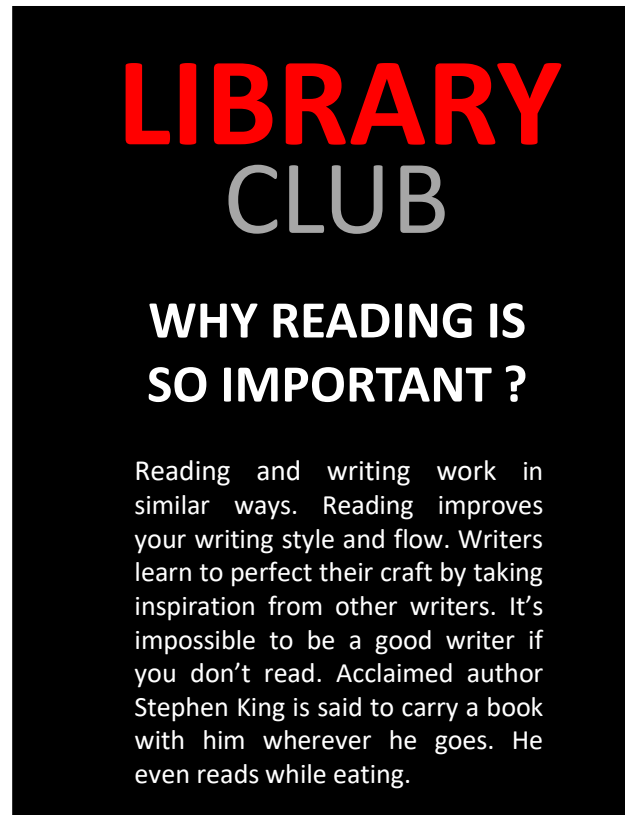

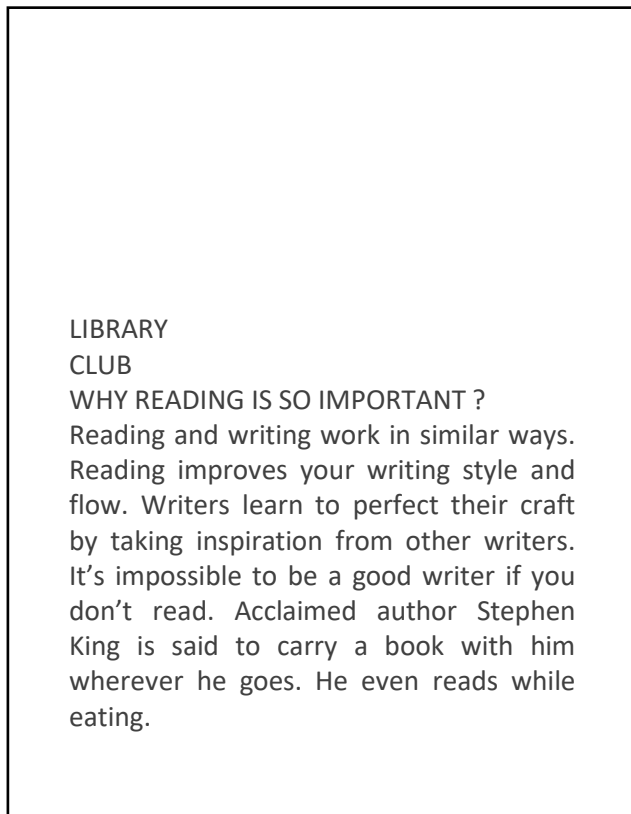

Negative Space

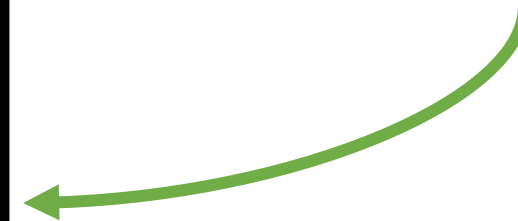

Contrast

- ✓ Not related elements are **graphically different**
- ✓ A visual must contain **1 or many elements in contrast**, to guide the reader eyes into the page

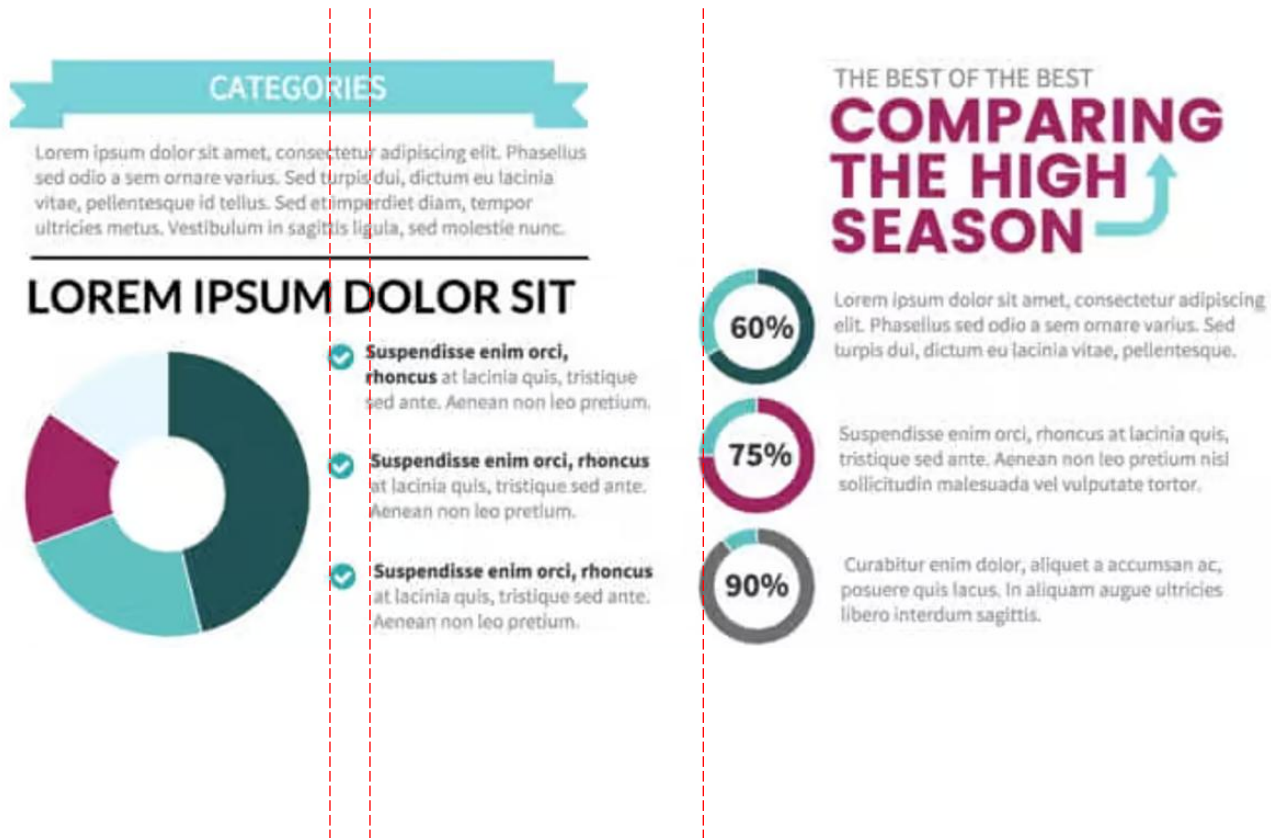

Q1 - Does the design use **enough contrast** to differentiate elements?

Q2 - Do the elements with high contrast stand out as **intended**?

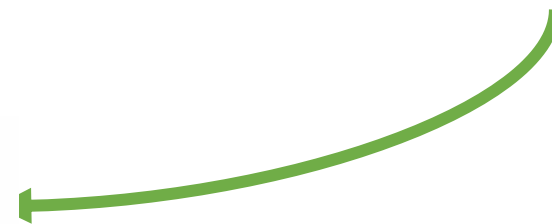

Alignment

- ✓ Alignment ensure elements are arranged in a visually appealing and logical way.
- ✓ **Nothing** should be placed on the page **arbitrarily** !
- ✓ An invisible line **connect aligned elements** !

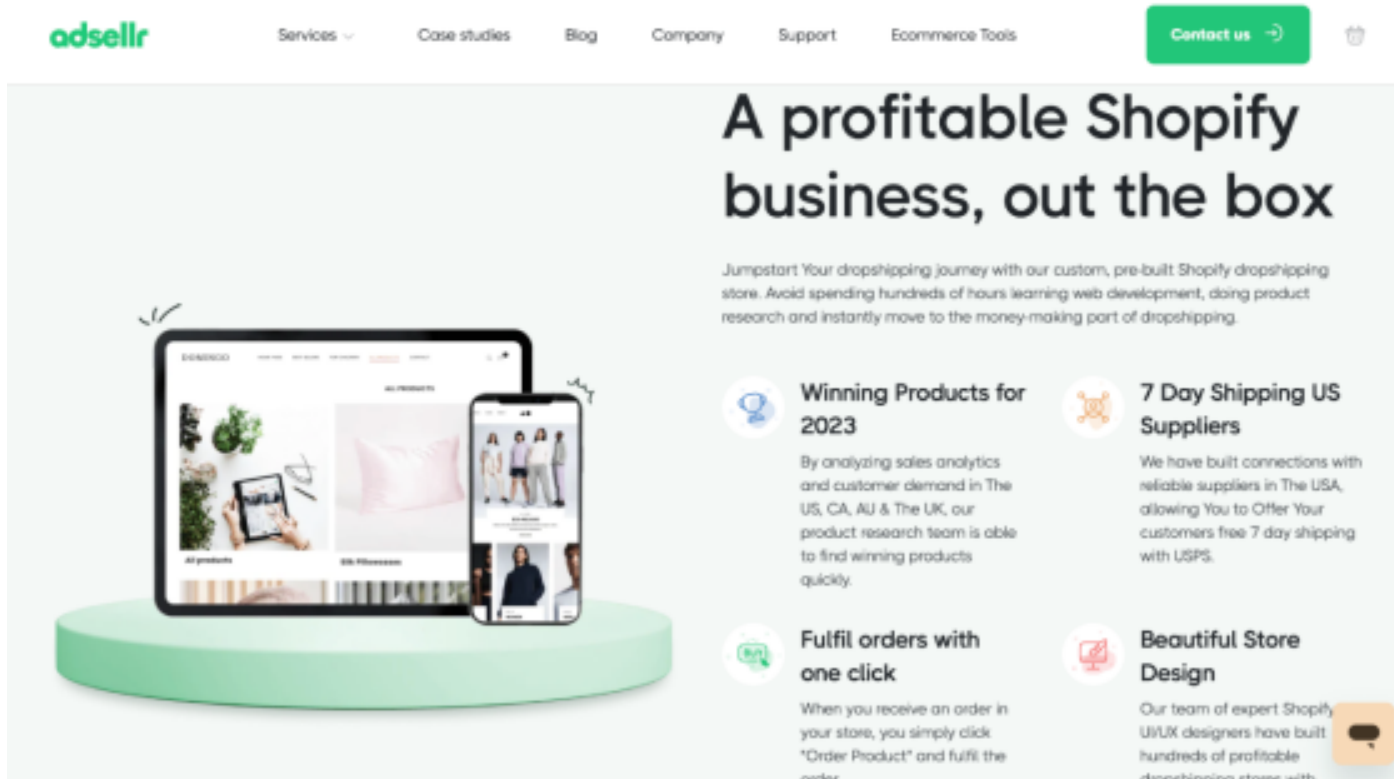

Q1- Are text, images, and other elements aligned properly to create order and cohesiveness?

Q2 - Are there any elements that feel "out of place"?

Proximity

- ✓ Proximity refers to the **closeness of related elements**.
- ✓ Things that are **related** should be close to **each other**

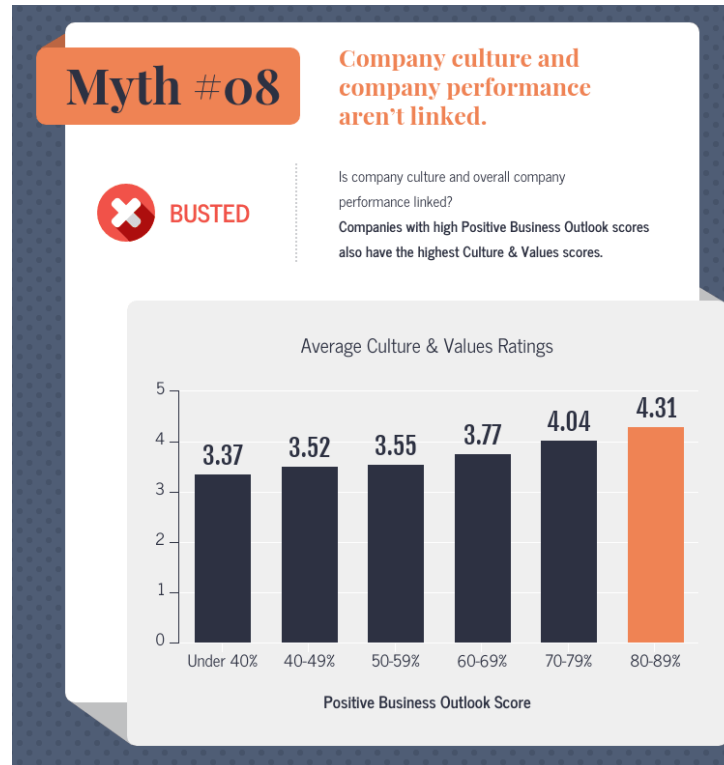

Q1- Are headlines, body text, and images that belong together placed **near each other**?

Q2 - Are elements spaced **too far apart** or **too close together**?

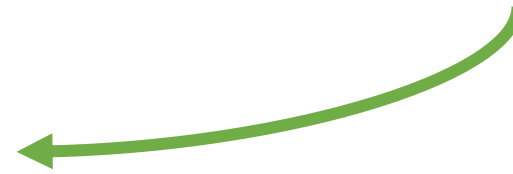

Repetition

- ✓ Repeat the style of some elements to **unify** and **link** them together
- ✓ It can be applied to elements : fonts, colors, shapes, or layouts
- ✓ Repetition makes a design more cohesive

Q1- Are colors, fonts, or shapes used consistently **across the design**?

Q2 - Does the repetition feel intentional and effective?

Balance

- ✓ Balance refers to the **distribution of visual weight** in a design
- ✓ It can be symmetrical or asymmetrical (*more dynamic but still visually balanced*)
- ✓ Proper balance ensures a sense of **stability** and **harmony** in the design

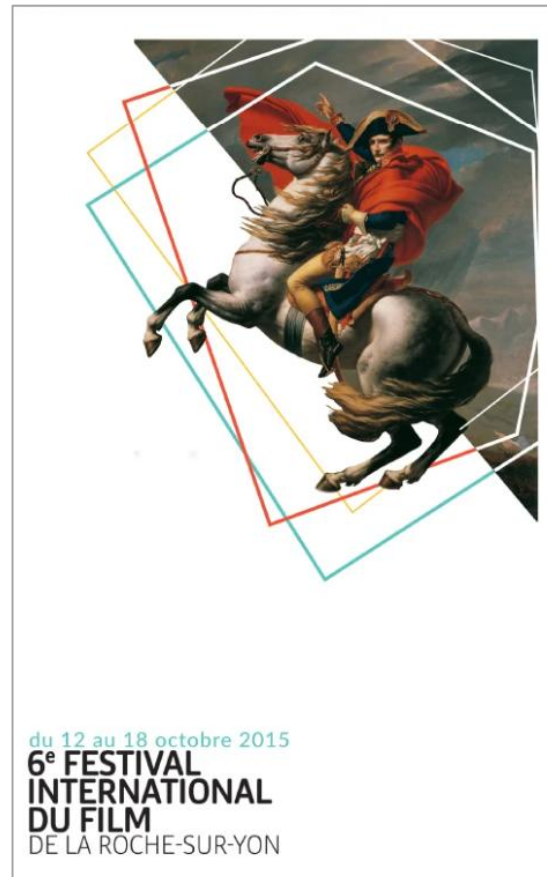

Q1- Is the design the same on both sides or does one side have more weight than the other?

Q2 - Does the design feel even and comfortable to look at, or does it feel lopsided and uneven?

White Space

- ✓ White space is the empty area between design elements.
- ✓ It makes it easier for the users to understand the **content** and the **relationships** between the elements

Q1- Does the design have enough white space to avoid overcrowding, or does it feel empty?

Q2 - Is the white space used to guide the viewer's eye effectively?

GROUP WORK

70 MIN

Group Work

See instruction in the document

1- **Analyze** 3 graphic designs regarding the principles we learnt

2- **Complete the** evaluation sheet

CATEGORY	CRITERIA
CONTRAST	- Does the design use enough contrast to differentiate elements? - Do the elements with high contrast stand out as intended?
ALIGNMENT	- Are text, images, and other elements aligned properly to create order and cohesiveness? - Are there any elements that feel "out of place"?
PROXIMITY	- Are headlines, body text, and images that belong together placed near each other? - Are elements spaced too far apart or too close together?
REPETITION	- Are colors, fonts, or shapes used consistently across the design? - Does the repetition feel intentional and effective?
WHITE SPACE	- Does the design have enough white space to avoid overcrowding, or does it feel empty? - Is the white space used to guide the viewer's eye effectively?
BALANCE	- Is the design the same on both sides or does one side have more weight than the other? - Does the design feel even and comfortable to look at, or does it feel lopsided and uneven?

3- **Presentation** to the class

- ✓ Your **graphical analysis**
- ✓ Your **proposition of improvements** *(if any)*
