Create Race

CATEGORY	CRITERIA	YOUR ANALYSIS
PROXIMITY	- Are headlines, body text, and images that belong together placed near each other? - Are elements spaced too far apart or too close together?	-: the 2 buttons (create segment, create race) should not be together, as they are not related to the same level - A race is the main element to create - A segment is a sub element of a race
CONTRAST	- Does the design use enough contrast to differentiate elements? - Do the elements with high contrast stand out as intended?	To highlight this difference (main vs sub element) : the 2 buttons should look like different (primary and secondary button)
